PORDAMSA PRODUCT FEATURES

MODELING

FINEST QUALITY RAW MATERIALS

HANDMADE PROCESS

All the products are designed and manufactured on our premises after 40 years. Pordamsa production team chooses the highest quality raw materials and follow rigorously all the manufacturing process to ensure the best quality standards.

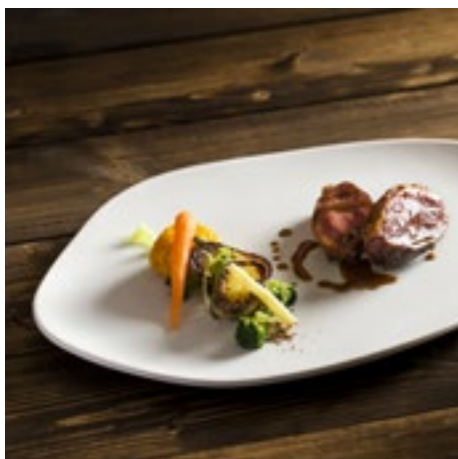

HIGH TEMPERATURE

PORDAMSA porcelain is fired up to 1400°C / 2552°F. The result is a durable product, more resistant to chip, scratch and break than low-fire ceramics.

GLOSS

MATTE

GLOSSY CENTER WITH MATTE RIM

After being heated, each piece is coated with gloss or matte enamel to get a non-porous and a long-lasting surface. The mix of gloss and matte finishing brings an attractive light contrast and is one of the differentiating characteristics of our porcelain.

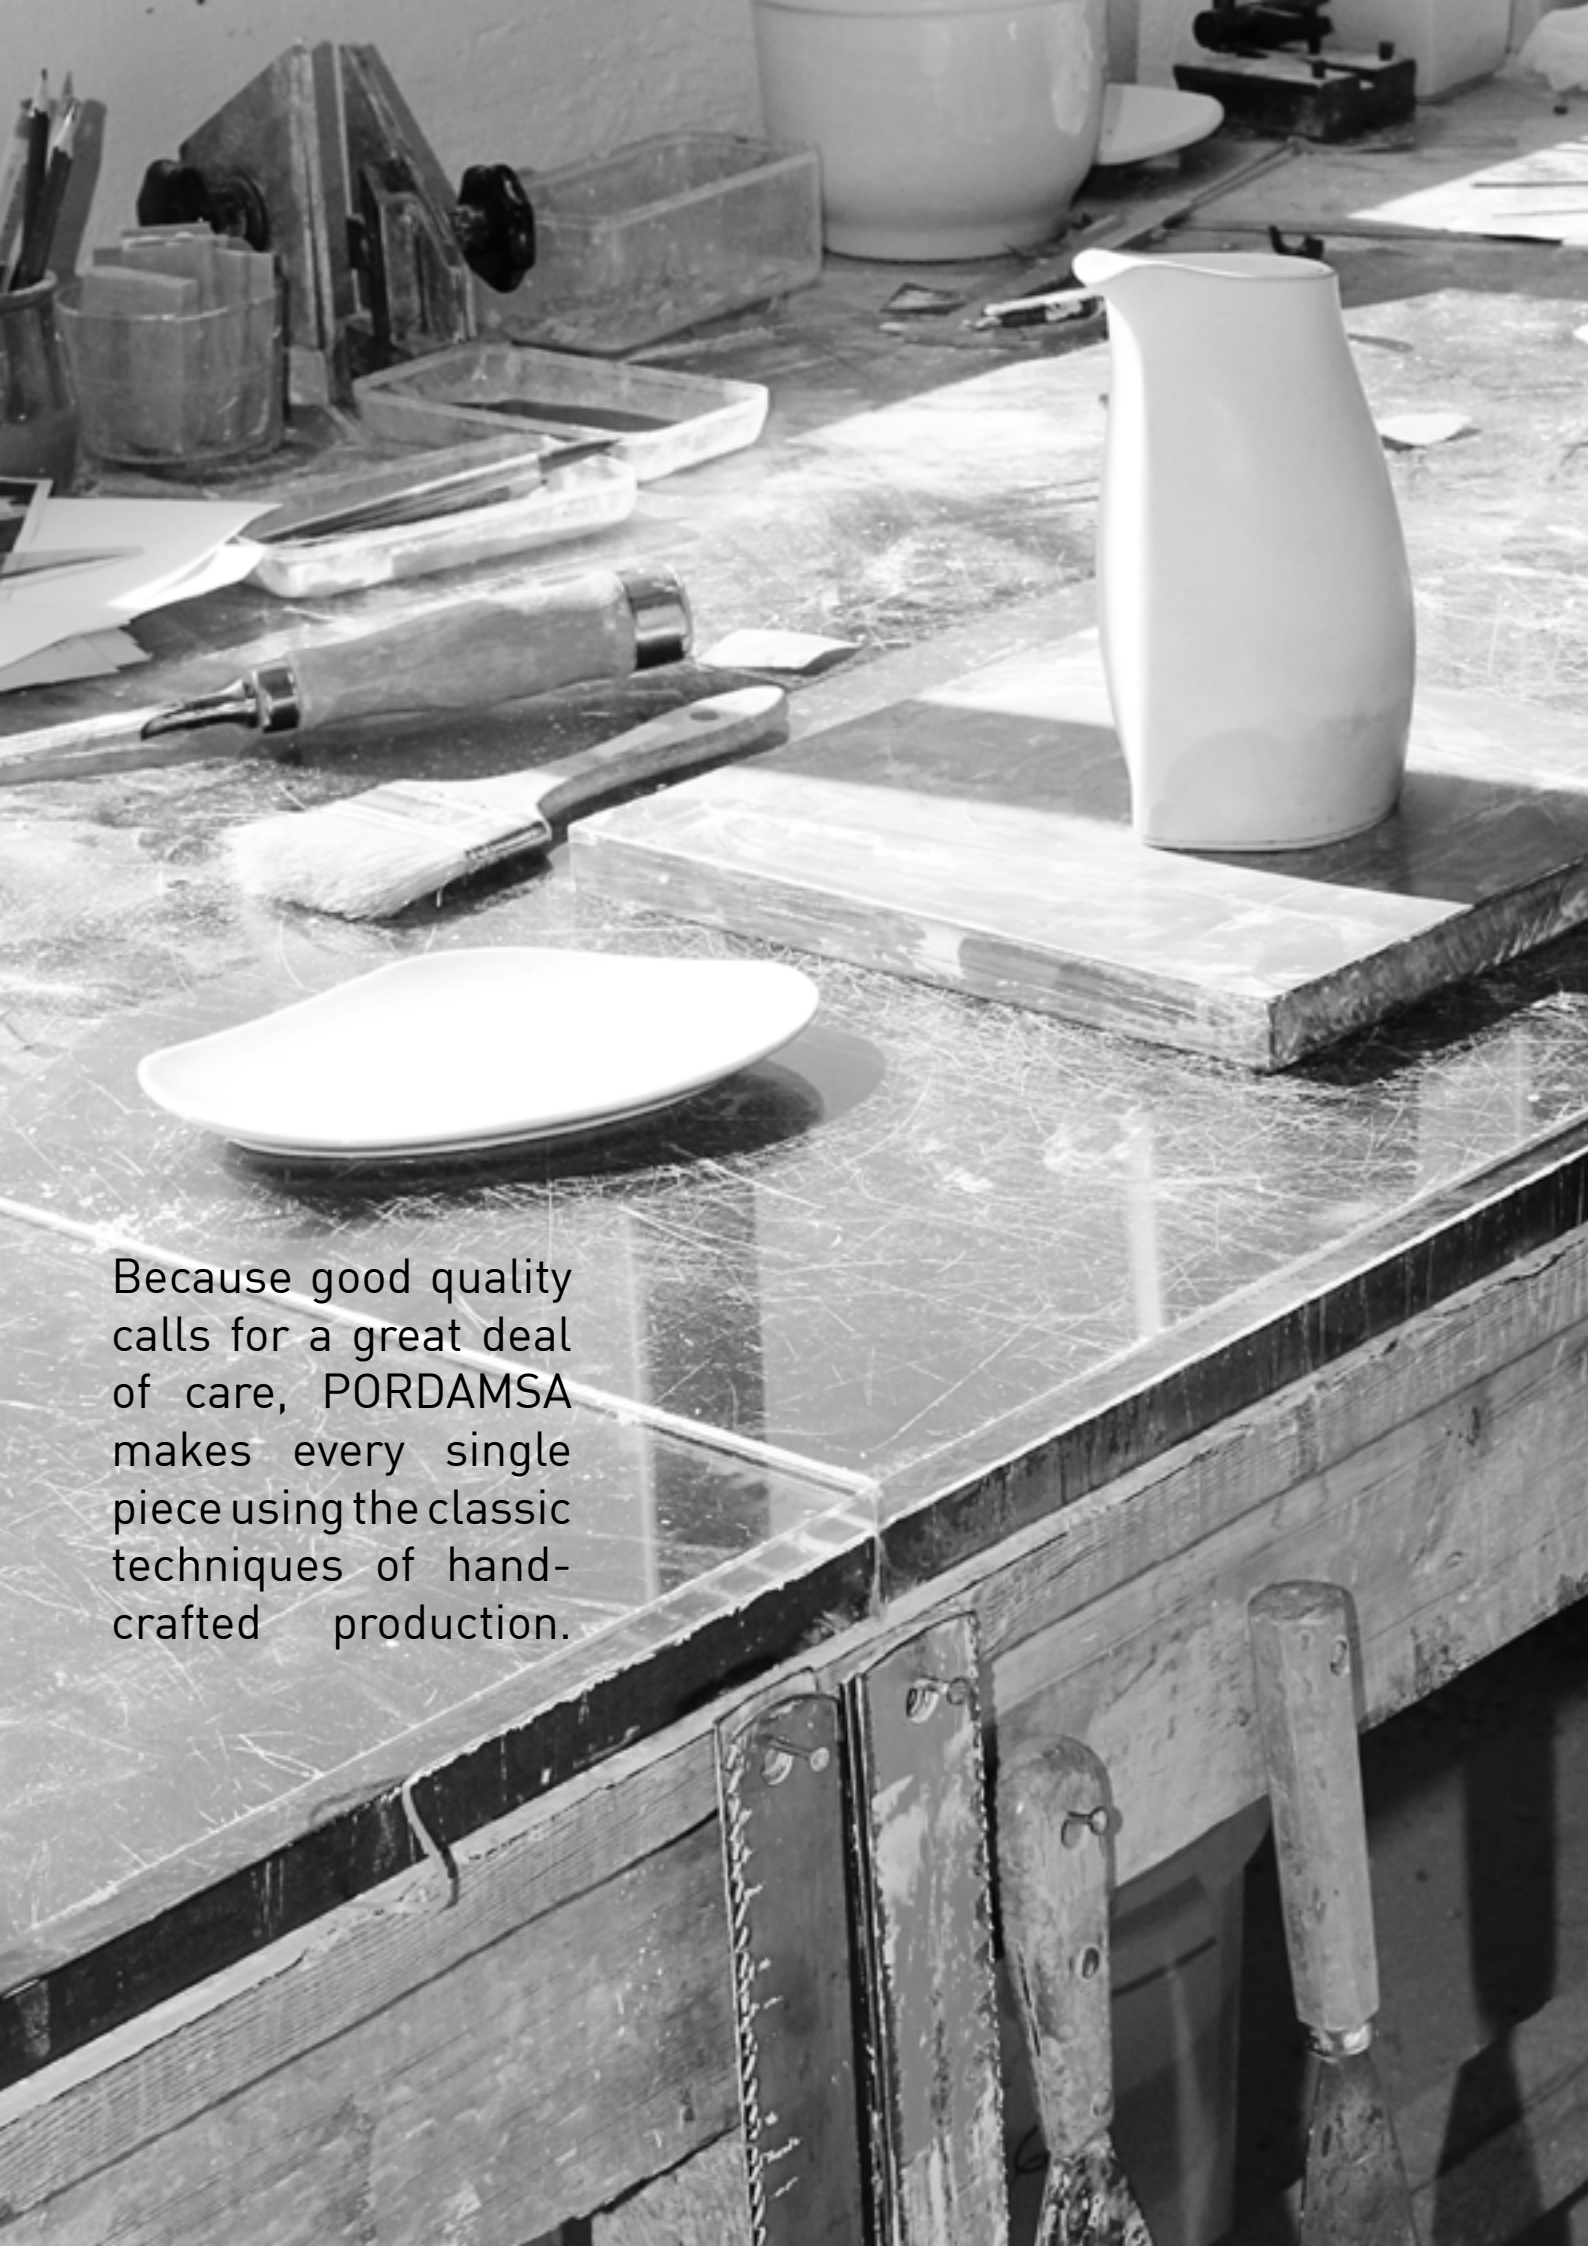

FUNCTIONALITY

For PORDAMSA, design is paired with comfort and practicality. All the items are aesthetically appealing yet easy to hand and store to make your everyday worklife easier.

HIGH RESISTANCE

All the items have a working range of -20°C / -4°F (300°C / 575°F), oven, microwave, dishwasher and freezer safe. We recommend avoiding extreme temperature changes.

Because good quality
calls for a great deal
of care, PORDAMSA
makes every single
piece using the classic
techniques of hand-
crafted production.
